The one-tier corporate governance system implies that the company has one or more directors.

The minimum subscribed share capital (monetary or non-monetary) amounts to no less than RSD 100 (unless a higher amount is stipulated by a separate law).

There is no requirement to pay up the in-kind or cash capital contributions at the time of incorporation of a limited liability company, the capital must only be subscribed, and the memorandum of association sets the deadline for the shareholders of the company to pay up the share capital. That deadline cannot exceed 5 years counting from the date of the adoption of the memorandum of association.

Joint Stock Company Corporate Governance:

When incorporating a joint stock company, the founder(s), depending on their needs, decide whether they are going to have a one-tier or two-tier system of corporate governance.

The one-tier corporate governance system implies that the company has one or more directors. In case a joint stock company with a one-tier management system has three or more directors, they form the board of directors presided by the chairman.

The two-tier corporate governance system implies that the company has one or more executive directors and a supervisory board.

In a joint stock company, the directors are the legal representatives of the company, however, not all of them have to be legal representatives, and only some of them may have this status if so determined by the founders.

Share (registered) capital of a joint stock company:

Subscribed shares that are payable in cash pursuant to the instrument of incorporation, are paid up prior to the registration of incorporation to the temporary account with a commercial bank in the Republic of Serbia. The shareholders founding the company must pay up at least 25% of the registered capital, provided that the paid-up amount of the cash contribution to the share capital cannot be lower than the amount of the minimum registered capital which is set at RSD 3,000,000.00.
